About Me

Video game programmer with over 5 years of experience in Unity and C#.

Versatile in developing 2D, 3D, and VR projects for PC and mobile. Quick to adapt to new genres, mechanics, and technologies thanks to a self-taught and continuous improvement mindset.

Personal Skills

- Responsibility and commitment.
- Fast learner and adaptable to new technologies.
- Problem-solving independently.
- Organization and efficient time/task management.
- Teamwork and effective communication.
- Attention to detail in development.

Languages

Spanish: Native

English: Intermediate

Ismael Valiente Maldonado

Unity Developer

Work Experience

Unity C# Programmer

Mysterious Hat

2023 - 2024

Project funded through a **European aid program** for video game development. **Solo programmer for the demo of "Evolution: From the Little Light" as part of an 8-person team.**

- Gameplay, systems, mechanics, and UI programming in Unity (C#).
- Optimization, debugging, and performance analysis.
- Participation in level, mechanic, enemy, and boss design.
- Publishing and digital distribution preparation.
- Project presentation at industry fairs (Bilbao, Málaga).

Indie / Freelance Developer

2020 - Present

Independent **development of various games for PC, mobile, and VR using Unity and C#**. During this time I gained experience in:

- AI programming (behavior trees, pathfinding, NPC and enemy logic).
- VR experiences using XR Interaction Toolkit.
- Responsive UI design and implementation.
- Performance optimization, debugging, and performance analysis.
- Integration of third-party plugins (DoTween, EasySave, Rewired, etc.).
- Monetization with Google AdMob ads.
- Publishing on Steam, Google Play, App Store, Itch.io.
- Version control with GitHub.

C# Programmer

Arion Grupo BAS

January 2019 - August 2019

Worked in the Human Resources department developing business management software for our clients:

- Fixing programming and UI design bugs.
- Managing and maintaining databases.
- Communicating with clients, providing support, and implementing new tools.
